20       <p>
21         The Parkinson's disease is progressive neuro degenerative disorder that affects a lot only people significantly affecting their quality of life
22         It mostly affect the motor functions of human. The main motor symptoms are called "parkinsonism" or "parkinsonian syndrome".
23         The symptoms of Parkinson's disease will occur slowly, the symptoms include shaking, rigidity, slowness of movement and difficulty with walking.
24         Thinking and behavior change, Depression and anxiety are also common
25         There is a model for detecting Parkinson's using voice. The deflections in the voice will confirm the symptoms of Parkinson's disease
26       </p>
